

Summary

**The recordings of official document with a gold seal in the Archangel charter**

As the conclusion of his analysis, the author points out that the fact that the legal norms in the official documents with a gold seal of Saint Sava are mentioned in the Archangel Charter does not necessarily mean that they were recorded in it. The author refutes the standing that the absence of mentioning the legal norms in the Charter of Studenica may be the evidence for contesting of its authenticity. He concludes that the only evidence which can prove that the Charter of Studenica is a counterfeit can be that coming out of the analysis of possession and diplomatic analysis.
